

# Javier Garcia Garcia

## Data Engineer

Murcia, Spain · [github](#) · [web](#) · [javiggv99@gmail.com](mailto:javiggv99@gmail.com)

---

*I'm genuinely curious about how things work and always looking for ways to make them better. I love learning new things and turning that knowledge into practical improvements.*

**Main stack:** *Scala, Apache Spark, Apache Flink, SQL, Python, FastAPI, PyTorch, Jupyter, Apache Airflow, Linux, Docker, Jenkins, Git, AWS, GCP, Snowflake, Hugging Face Transformers, Langchain.*

### PROFESSIONAL EXPERIENCE

---

#### UST España & Latam

Data Engineer at Telefonica I+D

Madrid, Spain

Apr 2025 - Present

- Processed millions of daily IoT SIM activity records with Apache Spark (Scala), turning raw telemetry into actionable insights that enabled near real-time, data-driven product decisions.
- Automated end-to-end data workflows with Python and Airflow, replacing hours of manual execution and ensuring reliable, on-time delivery of business-critical reports.
- Reduced GCP costs across BigQuery, Cloud Storage, and Dataproc while improving analytical query latency from hours to minutes through storage optimization and efficient distributed compute usage.
- Work in the migration of the data ecosystem from Google Cloud Platform to AWS, redesigning storage and analytics with Amazon S3, Redshift, and Athena to improve scalability, operational consistency, and cost efficiency.

#### Logicalis

Data Engineer at Atresmedia

Madrid, Spain

Mar 2024 – Apr 2025

- Built and evolved an AWS-based ETL platform (new features, enhancements, and bug fixes), using Spark/Scala and partitioning strategies to improve performance and scalability.
- Designed and implemented scalable batch ingestion workflows using AWS Lambda, ensuring reliable data intake and consistent downstream processing.
- Developed and deployed Lambda functions to automate authentication and data extraction from major ad platforms (TikTok Ads, Meta Ads, Google Ads), improving ingestion reliability and reducing manual intervention.
- Optimized end-to-end data pipelines across AWS services and external systems (including Snowflake). Worked on migrating analytics workloads from Amazon Redshift to Snowflake.

#### Nubika Cloud Solutions

Data Engineer

Murcia, Spain

Nov 2022–Mar 2024

- Development of datasets, and dataflows on Salesforce Einstein Analytics (SAQL, SQL).
- Building data warehouse and data lake using MuleSoft on Amazon S3 and Amazon Redshift services.

**Sisytec Networks**  
Software Developer

**Murcia, Spain**  
*Sep 2021 - Nov 2022*

- Development of API, JWT authentications and user interface for web environments (PHP, Node.js, Git, JS, Angular, JQuery, CSS, SQL).

## EDUCATION

---

**UNIVERSITAT OBERTA de CATALUNYA**  
Data Science Degree

**Barcelona, Spain**  
*Feb 2022 - Sep 2026*

**IES JOSE PLANES**  
Web Applications Development Associate Degree (CFGGS)

**Murcia, Spain**  
*Sep 2019 - Dec 2021*

## SKILLS

---

- Certifications: [Microsoft Azure AI 900](#), [Databricks Generative AI Fundamentals](#) and [Databricks Lakehouse Fundamentals](#).
- Native Spanish and B2 English level.
